Colorado State University Corn Test Plot Harvest

(Burlington, Colo.)

Colorado State University Plant Sciences teams are busy harvesting the 2015 corn tests. The refurbished combine pictured has the ability to perform a number of tests on corn hybrids being researched on-farm within Northeastern Colorado. Data will be available to corn farmers later this fall.

###

Colorado State University Extension programs are available to all without discrimination.

Colorado State University Extension is your local university community connection for research-based information about natural resource management; living well through raising kids, eating right and spending smart; gardening and commercial horticulture; the latest agricultural production technologies and community development. Extension 4-H and youth development programs reach more than 90,000 young people annually, over half in urban communities.
