

COLORADO ENERGY MASTER

Fall Course Registration Now Open

Colorado State University Extension is proud to offer our second annual Colorado Energy Master program. Take one or more three-week courses on “Energy Today”, “Energy Efficiency”, and/or “Renewable Energy”. The program offers:

- A comprehensive overview of clean energy in Colorado
- Hands-on activities and short field trips for experiential learning
- The latest information on saving energy and money
- Background knowledge and skills for energy-related careers
- Volunteer opportunities in your local community
- Continuing education credits available through the U.S. Green Building Certification Institute and Colorado Association of Realtors

For more information and to register: www.ext.colostate.edu/energymaster

Colorado State University Extension programs are available to all without discrimination. If you need special accommodations to participate in courses, please contact your local program representative at www.ext.colostate.edu/energymaster
